SUMMARY

Frontend Developer with 1.5+ years of experience building responsive, scalable web applications using React.js, Next.js, TypeScript, and JavaScript (ES6+) for enterprise and client-facing products. Delivered independent frontend ownership across four products — a Contract Management System, the IVBM static website, the Zice ESG platform, and the Robolab robotics-scanning platform — covering RBAC-driven UI, multi-step workflows, authentication, and REST API integration. Built and recommended state-management strategy (TanStack Query vs Zustand), established a reusable component/orchestration pipeline adopted team-wide, and received the "Budding Star of the Year 2025–2026" recognition. Currently extending into backend development with Python, FastAPI, and SQLAlchemy to build full-stack capability.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Responsive Design, Performance Optimization (code-splitting, lazy loading)

State & Data: TanStack Query, Zustand, REST API Integration

Backend (growing): Python, FastAPI, SQLAlchemy, Pydantic v2, PostgreSQL, JWT/OAuth2, Bcrypt

Tools & Practices: Git, GitHub, RBAC design, Vitest (testing), Postman

Soft Skills: Team Collaboration, Problem-Solving, Effective Communication, Time Management

EXPERIENCE

Pirai Infotech Private Limited *Pollachi, India*

Frontend Developer | Apr 2025 – Present

Contract Management System (CMS) *Apr – Aug 2025*

- Independently developed a CRUD-based Template Module end-to-end — UI, API integration, and bug fixing — for a centralized system managing the full lifecycle of organizational contracts.
- Built interfaces for contract creation, review, and multi-level approval workflows, including role-based access control (RBAC).
- Handled QA-reported issues independently and ensured on-time delivery, including weekend support when required.

IVBM / EasytoAudit Static Website *2025*

- Delivered the project fully independently after self-learning Next.js within a short timeframe, with no prior framework experience.
- Built a complete, responsive, reusable component-based website within the agreed timeline — work recognized with written stakeholder appreciation.

Zice — ESG Platform *Aug 2025 – Apr 2026*

- Owned frontend delivery across Login/Authentication (OTP, refresh tokens, self-onboarding), Indicator Repository (ESG hierarchy from pillars to metrics), Unit of Measurement & Conversion, Control Centre, Materiality Assessment, Report Configuration, Chatbot, and Subscription modules.
- Led R&D comparing Zustand vs. TanStack Query for state management; recommendation was adopted platform-wide. Built the application's base layout from scratch.
- Resolved 87 of 90 high/highest-severity defects and drove 4 of 5 major feature epics to closure, strengthening platform stability ahead of release.
- Returned in Jul 2026 for a change-request phase alongside Robolab work — owned delivery end-to-end (implementation, UAT support, client-facing walkthrough with user guide), completed ahead of deadline.

Robolab — Robotics Scanning Platform *Apr 2026 – Present*

- Sole frontend owner on the project — no parallel frontend resource assigned — across two applications: internal Backoffice and client-facing portal.
- Delivered both applications within the planned launch window, with zero rejected pull requests and no post-launch production incidents.
- Implemented RBAC-driven access control, JWT route guards with session/expiry handling, multi-step configuration/approval workflows, and shared UI/API modules.
- Continuing active ownership of both applications, including post-release enhancements and support.

Pirai Frontend Orchestrator *Jun – Aug 2026*

- Designed and built an internal requirements-to-code orchestration pipeline — a staged workflow (setup, analysis, architecture, planning, dependency validation, generation, validation) that takes a feature from raw requirements through to standardized implementation.
- Authored a 216-file reusable component and pattern library covering common frontend categories (state management, forms, routing, UI primitives), giving the team a consistent baseline instead of ad-hoc per-project patterns.
- Primary contributor on a 4-person initiative, driving majority of the implementation; adopted as the standardization baseline for subsequent frontend codebases.

ACHIEVEMENTS & CERTIFICATIONS

- Budding Star of the Year 2025–2026 — leadership-selected recognition, Pirai Infotech
- Python Essentials 1, Cisco Networking Academy — Aug 2026

EDUCATION

Institute of Road and Transport Technology *Erode, India*
Bachelor of Engineering (B.E), Computer Science and Engineering 2022 – 2025

Nachimuthu Polytechnic College *Pollachi, India*
Diploma in Automobile Engineering 2019 – 2022

STRENGTHS

Clean Code & Reusable Component Development | Cross-Team Collaboration | Quick Learning & Adaptability

LANGUAGES

English — Proficient | Tamil — Native | Telugu — Spoken (Conversational)
